About Me

I started developing games at a young age, driven by curiosity and a deep passion for interactive systems. With over 15 years of experience using Unity, I have built everything from experimental prototypes to commercial titles.

My background in Computer Science allows me to design scalable, maintainable architectures while crafting engaging gameplay experiences.

I have also taught Game Development at university level and in public schools, strengthening my leadership, mentorship, and communication skills.

Skills

- Game Development & Design
- Programming & Engineering
- VFX & Visual Feedback
- DevOps & Production Workflow
- Web Development

languages

Portuguese - Native
English - Full Professional
Spanish - Professional Working
French - Limited Professional

Experience

Game Developer & Project Lead — **2019 - 2026**
Bloom Effect Studios

- Designed and implemented scalable gameplay systems
- Led gameplay balancing and mechanic development
- Translated creative vision into structured technical solutions
- Planned production scope, milestones, and deliverables
- Optimized performance and solved complex technical issues
- Published and tested commercial and prototype titles

Scientific Researcher in Educational Games — **2021 - 2025**
Universidade Federal de Juiz de Fora

- Research on educational games and gamification for higher education
- Designed interactive systems to increase engagement and motivation
- Applied game design theory in academic contexts

Game Development Instructor — **2022 - 2023**

- **Federal University of Juiz de Fora**
- **Public Schools (Brazil)**

- Delivered structured courses on game development fundamentals, strengthening leadership, communication, and mentorship skills.

Education

CS50's Game Development — **2020 - 2021**
Harvard University

Bachelor's Degree in Computer Science — **2019 - 2025**
Federal University of Juiz de Fora (Brazil)

Postgraduate Specialization in VFX — **2026 - 2027**
VFX Apprentice

Core Competences

Game Development & Design

- Gameplay Systems Architecture
- Mechanics Design & Balancing
- Rapid Prototyping & Iteration
- Player Feedback Loops & Juice
- AI & Game Logic Systems
- Performance Optimization

Programming & Engineering

- C# (Advanced)
- Unity Engine (15+ years)
- Software Architecture
- Data Structures & Algorithms
- Clean Code & SOLID Principles
- Debugging Complex Systems

UI/UX

- Unity UI Toolkit
- User Experience Design
- Interaction Design
- Color Theory
- UX Laws
- Affordances
- Unity uGUI

VFX & Visual Feedback

- Unity Particle Systems
- Shader Graph
- Visual Game Feel & Impact Design
- Adobe Photoshop
- Toon Boom Harmony
- Aseprite

DevOps & Production Workflow

- Git & Version Control
- Repository Organization
- Documentation Systems
- Scope Planning & Milestones
- Kanban (Trello)
- Cross-functional Team Collaboration

Web Development

- TypeScript
- React / Next.js
- Node.js
- REST APIs
- Performance & Accessibility
